  - b. Through cookie files saved on electronic devices (so-called "cookies").
  - c. Through collecting web server logs of the hosting provider, operating at the given address – [www.en.handyshower.pl/](http://www.en.handyshower.pl/)

### **Information in forms**

1. The Website gathers information, which are voluntarily provided by users.
2. The Website can also save information about connection settings (time, IP address).
3. The data in the forms is not shared with third parties unless agreed upon with the user.
4. The data provided in the form may be a set of potential customers, registered by the Website Operator in the register kept by the Inspector General for Personal Data Protection.
5. The data contained in the form is processed to meet the aim of a specific form, for example, to process a service request or contact clients.
6. The data provided in the form can be forwarded to subjects that implement certain technical services - this concerns the provision of information about the owner of a registered domain to subjects that are operators of Internet domains (primarily the Research and Academic Computer Network - NASK), services that support payments or other subjects with which the Website Operator cooperates in this field.

### **Information about cookie files**

1. The Website uses cookies.
2. Cookie files (so-called "cookies") are computer data, mainly text files, that are stored on electronic devices of the Website User and intended for use with the pages of the Web Service. Typically, cookies contain the name of a website from which they come, their storage time on the devices and a unique number.
3. The Website Operator places cookies in Website Users' devices and has direct access to them.
4. Cookies are used for the following purposes:
  - a. creating statistics that help to understand how Website Users use web pages, which may lead to improvement of the structure and its content;
  - b. maintaining Website Users' session (after logging in) due to which each user does not have to retype the name and password after browsing the pages;
  - c. determining user profile in order to display advertising materials matching their profile, in particular Google Network.

5. The Website uses mainly two basic types of cookies: session cookies and persistent cookies. Session cookies are temporary files that are stored on the electronic device until the User logs off by leaving the website or turning off the software (web browser). Persistent cookies are stored on the electronic device of the User for a specified time that is determined in cookie parameters or until the User deletes them.
6. Software for browsing websites (a browser) usually allows storing cookies on users' electronic services by default. Website Users can change these settings. The web browser allows deleting cookies. It is also possible to block cookies automatically. Details of how to do so can be found in the help section or the browser documentation.
7. Restrictions on the use of cookies may influence some of the functions available on the Website pages.
8. Advertisers and partners cooperating with the Website Operator can also use cookies placed on Website Users' electronic devices.
9. We recommend that you read the privacy protection policies of these companies to be aware how cookie files are used in statistics: Google Analytics Privacy Policy.
10. Ad networks may use cookies, especially Google, to display ads that are matched to the specific use of the Website. They may keep the information about the user's navigation paths and time spent on a given page.
11. In terms of information on users' preferences gathered by the Google ad network, each user can view and edit the information in the cookies with the use of the following tool: <https://www.google.com/ads/preferences/>

### **Server logs**

1. Information about some user behavior is subject to logging in into the server layer. This data is used only to administer the Website and provide the most efficient use of hosting services.
2. Browsed resources are identified by URL addresses. Moreover, the following may also be saved:
  - a. request time,
  - b. response time,
  - c. name of the client's station - the identification is carried out by the HTTP protocol,
  - d. information about errors that occurred during implementation of the HTTP transaction,
